5 weeks

Tools used

Overview

Flassabekken Barnehage hired me to design a new logo that reflects their vision "better together" along with development, learning and robust children. Over five weeks, I explored multiple concepts and met regularly with the client to review ideas and gather feedback, leading us to agree on the final design together. The logo is now used across their signage, print materials, and digital channels.

Project Timeline and Structure

- Week 1
  - Met with client to discuss vision, values, and desired style
  - Collected references and created moodboard
- Week 2
  - Drew multiple hand-sketches exploring shapes, symbols, and typography ideas
- Week 3-4
  - Developed selected sketches in Figma
  - Tested colours, typography, and layout variations
  - Held review meetings with client to refine design
- Week 5
  - Prepared final logo files in multiple formats and color versions
  - Delivered logo guide and usage instructions

Primary Logo

The final logo design features a flowing stream made of two organic S-shapes, three children at play, and a flying heron beneath a half-circle sun. The name of the kindergarten sits below the stream, and the calm blue-tone palette reflects nature, harmony, and trust.

Logo Colour Variation

The logo is designed to remain clear and recognizable across different backgrounds. These variations ensure consistent visibility in full colour, white, grey, and black, whether used on light, dark, or colored surfaces.

Conclusion

This project resulted in a versatile and memorable logo that reflects the kindergarten's values and will serve as a strong visual identity for years to come.
